[Abdelrahman-Hussin](#) in

6th of October City, Egypt 📍

EDUCATION

Bachelor's Degree in Computer Science
October University for Modern Sciences & Arts (MSA) Validated by the University of Greenwich, UK Class of 2025 GPA:
3.04 (EG)

EXPERIENCE

SYSORA
Egypt
Full-Stack Developer

- Develop and maintain production-ready web applications using React and ASP.NET Core.
- Build responsive and reusable React components for modern user interfaces
- Design and develop RESTful APIs using ASP.NET Core Web API.
- Integrate frontend applications with backend services and SQL databases.
- Participate in debugging, testing, deployment, and performance optimization.

Nov 2025 - Present

Nov 2025 - Present

National Data Management
Cairo - Egypt
Full-Stack Developer

- Developed enterprise web applications using Angular and ASP.NET.
- Built responsive frontend interfaces and backend REST APIs.
- Integrated SQL databases and business logic into internal systems.
- Collaborated with the development team using Agile methodologies.

Aug 2025 - Oct 2025

Aug 2025 - Oct 2025

PROJECTS

Restaurant Management System
2026

- Developed a complete restaurant management system using React and ASP.NET Core.
- Implemented menu management, order processing, reservation handling, and cashier operations.
- Built secure authentication and role-based authorization using JWT.
- Developed RESTful APIs and integrated SQL Server for data management.
- Designed responsive dashboards for administrators and restaurant staff.
- Optimized performance while delivering a modern user experience.

Apr 2026 - May

Clinic Management System

- Developed a full-stack clinic management platform using React and ASP.NET Core.
- Implemented appointment scheduling, patient records, and doctor management modules.
- Built secure authentication with JWT and role-based authorization.
- Developed RESTful APIs and integrated SQL Server databases.
- Designed responsive dashboards for administrators, doctors, and receptionists.

Jun 2026 - Present

- Improved application performance and maintainability.

SYSORA Website (Live Project)

May 2026 - Jun 2026

- Developed and maintained a production-ready business website using React and ASP.NET Core.
- Built responsive user interfaces using reusable React components.
- Developed RESTful APIs and integrated frontend with backend services.
- Improved application performance, responsiveness, and user experience.
- Participated in deployment and production maintenance

AYONK Website (Live Project)

Mar 2026 - Apr 2026

- Developed a commercial full-stack web application using React and ASP.NET Core.
- Built responsive user interfaces following modern web development practices.
- Developed RESTful APIs and integrated frontend with backend services.
- Optimized application performance for production deployment.
- Delivered a scalable and maintainable software solution.

Smart Mental Health Detector (Graduation Project)

Sep 2024 - May 2025

- Developed an AI-powered mobile application using Flutter and Firebase.
- Integrated an intelligent chatbot for mental health assessment and support.
- Applied machine learning models for mental health classification.
- Built dashboards to visualize assessment history and user progress.
- Published the project as an IEEE conference paper at NILES 2025.

TECHNICAL SKILLS

.Net	Frontend	Database
• C# • ASP. NET Core (MVC) • Entity Framework • Ado. NET • Windows Form • Web API • LINQ	• HTML5 & CSS3 • Bootstrap • Angular • React	• SQL • PostgreSQL • NoSQL • MongoDB
Concepts	Backend	
• JWT Authentication • Role-Based Authorization • MVC Architecture • Responsive Design	• JavaScript ES6 • Node.js Express	
	Task Scheduling:	
	• Hangfire	
	Message Brokers	
	• MSMQ/ RabbitMQ / Redis Stream	

CERTIFICATIONS

- Microsoft Azure AI Fundamentals
- Microsoft Azure Data Fundamentals
- Front-End Web Development Information Technology Institute (ITI)

PUBLICATION

- An Ensemble Learning Approach for AI-Powered Chatbot for Mental Health Assessment and Support

IEEE NILES 2025

LANGUAGES

- Arabic
- English
