Summary

Software Engineer and Full-Stack Developer with hands-on experience building scalable web applications using modern technologies including React, Node.js, Angular, and .NET. Strong background in data analysis and system design, with a passion for developing efficient, user-focused solutions.

Education

B.Sc. in Computer Science

Sept 2021 – May 2025

October University for Modern Sciences & Arts (MSA)

Validated by University of Greenwich, UK

GPA: 3.02 (UK) — 3.04 (EG)

Experience

Full-Stack Developer — SYSORA

Nov 2025 – Present

- Develop and maintain full-stack web applications using modern JavaScript frameworks and backend technologies.
- Build responsive user interfaces and scalable RESTful APIs.
- Collaborate with cross-functional teams to deliver production-ready systems.

Full-Stack Developer — National Data Management

Aug 2025 – Oct 2025

- Developed enterprise web applications using Angular and .NET.
- Implemented frontend components, APIs, and system integrations.
- Contributed to internal data platforms and automation tools.

Projects

Smart Mental Health Detector (Graduation Project)

Sep 2024 – May 2025

- Built a cross-platform mobile application using Flutter and Firebase.
- Integrated AI-powered chatbot for early mental health assessment and support.
- Applied machine learning models including SVM and Logistic Regression for mental health classification.
- Designed dashboards and analytics features for monitoring user assessments and progress.

AYONK Website (Live Project)

Mar 2026 – Apr 2026

- Developed a full-stack web application using React and .NET.
- Designed and implemented responsive user interfaces and RESTful APIs.
- Integrated frontend and backend services to deliver a seamless user experience.
- Deployed the application to production and optimized performance for real users.
- Improved usability, maintainability, and overall user experience.

Restaurant Management System

Apr 2026 – May 2026

- Developed a full-stack restaurant management system using React and .NET.
- Implemented menu management, order tracking, reservation handling, and user authentication.
- Built RESTful APIs and integrated database operations for efficient data management.
- Designed responsive dashboards for administrators and staff.

SYSORA Website (Live Project)

May 2026 – Jun 2026

- Developed and maintained a production-ready web application using React and .NET.
- Built responsive and modern user interfaces with reusable React components.
- Developed RESTful APIs and integrated frontend with backend services.
- Participated in deployment, testing, and performance optimization for a live public website.

Clinic Management System

Jun 2026 – Present

- Developed a full-stack clinic management platform using React and .NET.
- Implemented appointment scheduling, patient records management, and doctor dashboards.
- Built secure authentication and role-based access control.
- Developed RESTful APIs and integrated database services for healthcare workflows.

Technical Skills

.NET: C#, ASP.NET Core (MVC), Entity Framework, Windows Forms, Web API, LINQ

Concepts: JWT Authentication, Role-Based Authorization, MVC Architecture, Responsive Design

Frontend: HTML5, CSS3, Bootstrap, Angular, React, JavaScript ES6

Backend: Node.js, Express.js

Task Scheduling: Hangfire

Message Brokers: RabbitMQ, Redis Streams

Database: SQL, PostgreSQL, NoSQL, MongoDB

Certifications

- Microsoft Azure AI Fundamentals
- Microsoft Azure Data Fundamentals
- Front-End Web Development (ITI)
